Stomacare **PLUS** belts

The next generation ostomy belts

The “Plusses” at a glance

*Stoma aperture finished with an integrated Multiflex ring or where size and shape can be individually tailored**

Coolmax fabrics for high user comfort and pleasant body temperature

Integrated prolapse cover for ostomy shielding

Thin and unelastic abdominal panel supports the abdominal wall

Light gray color offers optimal discretion

Available in four heights to accommodate individual needs

* Model dependent.

Stomacare **PLUS**

High user comfort due to Coolmax material

The new “Plus” series within the Stomacare belt range is manufactured from a breathable Coolmax material, which ensures maximum perspiration removal. The moisture that is released is transported away from the body through the hollow core of the fiber. At the same time, the air in the hollow core keeps the wearer warm. The moisture spreads and evaporates four times faster than with cotton. This keeps the body comfortably dry - even during physical activities.

Tailored to individual needs

To meet individual demands, the Stomacare Plus belts are available in several models, each in four heights and identifiable by its light gray color. This color offers optimal discretion, even under light-colored clothing and thus an extra Plus for quality of life.

* With the exception of the EasyOpener Plus.

Stomacare^{PLUS}

Standaard *Plus* Belt

High wearing comfort due to Coolmax material

The Standard *Plus* belts are made of breathable Coolmax material, which ensures maximum perspiration dispersion from the body into the belt fabrics. The moisture that is released, is transported away from the body via the hollow core of the fiber. This keeps the body pleasantly dry, even during increased physical activities. The light gray color offers optimal discretion, even under light-colored clothing.

Tailored to individual needs

The Standard *Plus* belt is used as a postoperative support for the abdominal wall to prevent prolapse and/or parastomal hernia caused by, e.g., obesity or more intense physical activities (sports, gardening, housekeeping, etc.) and provides extra fixation for the ostomy pouch. The belt offers ostomates a high sense of wearing comfort and a safe feeling in everyday life. The Standard *Plus* belt is available in four different heights.

The “Plusses” at a glance:

- Coolmax material offers high user comfort and pleasant temperature regulation
- Light gray color offers optimal discretion
- The integrated Multiflex ring offers proper hygiene and ensures a solid and stable stoma aperture
- Thin and unelastic front panel supports the abdominal wall to prevent prolapse /hernia
- Integrated prolapse cover for ostomy shielding
- Available in four heights

Features

- Stoma aperture finished with plastic Multiflex ring
- Built-in stabilizing ribs to prevent wrinkling ensuring stable support and optimal fit
- Velour panel to fixate accessories like the Protector or BellyBag
- Materials: Latex-free; Coolmax (polyester, polyamide, elastane); velours: (polyester); plastics: (POM, TPE)
- Color: light grey

Stomacare^{PLUS}

EasyOpener *Plus* Belt

High user comfort due to Coolmax material

The EasyOpener *Plus* Ostomy Belt is manufactured of breathable Coolmax material, which ensures maximum removal of perspiration from the body towards the fabric of the belt. This keeps the body pleasantly dry, even during increased physical activity. The light gray color offers optimal discretion, even under light-colored clothing.

More convenient changing of the ostomy pouch

The EasyOpener *Plus* Ostomy Belt has a second, embedded closure underneath the stoma aperture and offers more comfort when changing the stoma pouch: the belt does not have to be completely taken off first. The EasyOpener *Plus* belt has a standard height of 15 cm and has an integrated stoma opening that is finished off with a multiflex ring. To determine the correct diameter, the outer flange size of the relevant system will determine the size.

The “Plusses” at a glance:

- Coolmax material offers high user comfort and pleasant temperature regulation
- Light gray color offers optimal discretion
- The integrated Multiflex ring offers proper hygiene and ensures a solid and stable stoma aperture
- Thin and inelastic front panel supports the abdominal wall to prevent prolapse /hernia
- A second, embedded closure underneath the stoma aperture offers more comfort when changing the stoma pouch
- Integrated prolapse cover for ostomy shielding

Features

- Stoma aperture finished with plastic Multiflex ring
- A second, embedded closure underneath the stoma aperture provides more convenience during ostomy pouch changes
- Built-in stabilizing ribs to prevent wrinkling ensuring stable support and optimal fit
- Velour panel to fixate accessories like the Protector or BellyBag

Stomacare^{PLUS}

EasyCut *Plus* Belt

High wearing comfort due to Coolmax material

The EasyCut *Plus* belt is constructed with Coolmax, which features high air permeability and wicking properties making it soft next to the skin and breathable, so minimizing discomfort through sweat. The moisture that is released spreads and evaporates 4 times faster than cotton and is transported away from the body via the hollow core of the fiber. This keeps the body pleasantly dry, even during increased physical activities. The light gray color offers optimal discretion, even under light-colored clothing.

Individual and easy customization

The EasyCut *Plus* is a customizable belt designed to allow you to cut the position, shape and size of the aperture specific to the individual needs of the Ostomate. The Easy Cut belt is made from super soft non-fray fabric. A cutting template with shapes in multiple diameters is included. In addition, the EasyCut *Plus* can be used in its base - i.e. without a stoma opening - as a Fixation Belt when using an irrigation system or after repositioning the Ostomy.

The “Plusses” at a glance:

- Coolmax material offers high user comfort and pleasant temperature regulation
- Light gray color offers optimal discretion
- Thin and inelastic front panel supports the abdominal wall to prevent prolapse /hernia
- Integrated prolapse cover for ostomy shielding

Stomacare Belts

For a confident feeling, all day long

Stomacare belts are primarily used postoperatively to support the abdominal wall. Ideal to manage prolapse and/or parastomal hernia in case of obesity or for use during vigorous exercise (sports, gardening, etc.) or heavy lifting. Stomacare belts are made of elastic material designed with stabilizing ribs that guarantee a good, wrinkle-free fit.

These firm supportive belts are easy to close with Velcro. Different models are available to suit individual needs. All models can be combined and applied with the usual stoma pouch systems.

*Velcro panel for attaching
optional Protector or BellyBag*

*Integrated reinforcement
supports the abdominal wall*

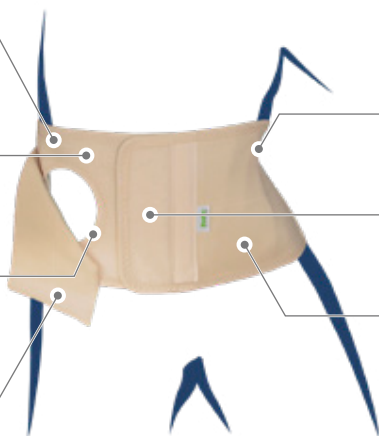

*Stoma aperture finished with
elastic edging binding*

*Stretchable prolapse cover

- Hernia around Ostomy (scar)
- Prolaps
- Enterostomy
 - Ileostomy
 - Colostomy
- Urostomy
 - Ileum/Colon Conduit
 - Ureterocutaneostoma

Stomacare

Standard Belt

The trusted and valued classic

The name 'Standard' is not without a reason. The design of this valued support has defined the standard on which the entire Stomacare series is based. The belt is made of durable, high quality elastic fabric that provides excellent firm support and simultaneously provides an optimal fit.

Stomacare belts are primarily used postoperatively to support the abdominal wall. Ideal to manage prolapse and/or parastomal hernia and offer Ostomates a high degree of comfort and a safe feeling in everyday life. The aperture allows the stoma pouch to come through, then the incorporated prolapse cover can be stretched over. This design allows for very strong support without crushing the stoma or diminishing flow but still protecting it. The Standard belts are available in three different heights. The outer flange size of the respective system is decisive to determine the right aperture diameter.

Features

- Height: 10 cm, 15 cm and 22,5 cm
- The Stoma aperture is vertically centered for the 10 and 15 cm high models
- The aperture on the 22,5 cm high model is positioned approx. 2,5 cm from the bottom edge
- Built-in stabilising ribs to prevent wrinkling ensuring stable support and optimal fit
- Velour panel to fixate accessories like Protector or BellyBag
- Materials: Latex-free; Belt: polyester and lycra; reinforcement panel: EVA; stabilising ribs: plastic
- Colors: white, beige or black

Stomacare

Standaard Semi-Finished Belt

For individual adjustment of the stoma aperture and belt fit

In addition to the finished models of the Standard belts, there are also semi-finished products available in this series. This not only allows tailored positioning and size definition of the stoma aperture, but also the possibility e.g. of inserting darts. A matching haber-dashery set is supplied with the belts.

The standard semi-manufactured belts are available in three different heights.

Features

- Height: 10 cm, 15 cm and 22,5 cm
- Tailored positioning and sizing of stoma aperture
- Built-in stabilizing ribs to prevent wrinkling ensuring stable support and optimal fit
- Velour panel to fixate accessories like Protector or BellyBag
- Materials: Latex-free; Belt: polyester and Lycra; reinforcement panel: EVA; stabilizing ribs: plastic
- Colors: white, beige or black

Stomacare

EasyOpener Belt

Comfort while changing ostomy pouch

The EasyOpener model is designed with a second, specially incorporated Velcro closure just below the stoma aperture, providing extra comfort when changing the stoma pouch. This eliminates the need to remove the entire support first. Full access to the stoma is gained by opening this additional closure and folding the edges slightly back.

Practical and efficient

The EasyOpener Support belt has a standard height of 15 cm and is equipped with an integrated quick release stoma aperture. In addition to the choice of different colors, a selection can also be made in diameter of the stoma aperture. To determine the right diameter, the outer flange size of the respective system is decisive.

Note: for patients with a very high internal abdominal pressure, these models may not be suitable due to the possible load on the special closure. In that event, the Stomacare Standard *Plus* or Stomacare Standard belts are more suitable.

Features

- Model height: 15 cm
- Integrated stabilizing ribs for an optimal fit
- Integrated Velcro for Protector attachment
- Materials: latex-free belt; 85% polyester and 15% lycra; strengthening plate: EVA
- Color: white, black or beige

Specifications

Stomacare

PotectorMax

The ProtectorMax is supplied in a protective box. Ideal for discreet storage and as a practical travel case.

Protect your stoma

The ProtectorMax provides Ostomates additional protection (e.g. at work, during driving, sports, etc.) against inconveniences and risks of pressure, bumps or unintended force effects on the stoma. It also reduces the risk of entrapment of the ostomy pouch, e.g. tummy sleepers, during intimate moments, wearing tight clothing, etc. The ProtectorMax offers discretion by covering the stoma and - thanks to its light grey colour - is virtually invisible, even under light colored clothing.

Specifications

11 cm

14 cm

70 to
140 cm

Features

- A shell-shaped, anatomical design that absorbs forces on impact
- Soft rubbery edging and inside surface padding for high wearing comfort against the skin
- Adjustable elastic waistband to fit different body shapes
- Grey color offers discretion and is almost invisible, even under light-colored garment
- Supplied with a protective plastic box for save transport and storage
- Materials: Latex-free; ABS, TPU, Nylon, Polyamide, Elasthane and Viscose

Belt Accessoires

Stomacare Protector

Protection against pressure and impact

The Protector provides additional protection against pressure, impact or unintended force effects on the stoma, e.g. during sports. When driving a car, the feeling of pressure caused by the seatbelt can be prevented too. The intergrated Velcro strips on the inside of shell-shaped Protector provide quick and easy attachment to the belt.

Features

- One size fits all

Stomacare BellyBag

Secure hold for the ostomy pouch

The BellyBag offers the stoma pouch a firm, supportive hold and provides more comfort, especially during physical activities. It can be easily attached to all Stomacare belts using a Velcro fastener.

Features

- Integrated Velcro for fixation to belt
- One size fits all
- Material: polyester
- Colors: white, light grey or black

Stomacare Size Trial Belt

Size measurement tool for Ostomy nurses

The Stomacare Size Trial Belt is a handy tool for the Ostomy nurse to determine the correct belt sizes, especially in case of unfavourable conditions of the soft tissue around the stoma.

Features

- Tool to determine best belt size
- Integrated size labeling (S-XXXXL)
- Height: 15 cm (6")
- Color: beige

Stomacare Belt support
for use in water

HydroActive Belt

Protection and safety in water

The HydroActive belt is constructed of a breathable neoprene material and has been specially developed for use in water (swimming, sauna, showers, water gymnastics, therapy, etc.). The belt can be used without any hesitation in both fresh and salt water. This belt will help to securely support and fix the pouch and covers the stoma. This offers the Ostomate the best protection and a safe feeling and discretion, during all water activities.

Features

- Height: 15 cm
- Swimming Belt for both fresh and salt water
- Integrated loop for easy donning and doffing
- Optimal fit due to elastic fabric
- Materials: Belt: 100% Polyamide with Neoprene; Stoma lid: 100% Neoprene
- Color: silver/grey
